

SUSTAINABILITY POLICY

COMMITMENT

Cross Yarra Partnership (CYP) is committed to:

- Embedding best practice principles across the three core commitment areas of environment, social and economic sustainability into every step of the project, from design through to construction, delivery and maintenance
- Ensuring lasting positive social benefits for those who directly or indirectly engage with the Project
- Building rail infrastructure that prepares for the challenges presented by climate change
- Respecting Melbourne's green spaces and heritage values
- Implementing innovative solutions in sustainable design and construction
- Working with our supply chain to achieve sustainable procurement outcomes.

APPROACH

CYP will adopt environmental, social and economic sustainability principles to create infrastructure that connects our communities and delivers a legacy for present and future generations.

POLICY IN PRACTICE

To deliver this with certainty we will:

- Achieve the Client sustainability targets as they apply to our scope of works, to address social, environmental and economic priorities through our Sustainability Management Plan
- Achieve a certified 'Leading' Design and As Built Infrastructure Sustainability (IS) Rating with a minimum IS score of 84 under the Infrastructure Sustainability Council of Australia (ISCA) IS Rating scheme
- Adopt green building practices and achieve a minimum 5 star certified Green Building Council of Australia (GBCA) Green Star rating for all stations
- Continually seek opportunities to go beyond compliance and enhance the environmental, social and economic aspects of the Project
- Implement an Innovation Management Framework to provide a process for managing innovation in a major project environment
- Assess climate change risks and identify appropriate adaptation measures
- Apply sustainable procurement processes that consider environmental, social and economic aspects
- Collaborate with our supply chain to achieve leading sustainability outcomes in our workforce and the products and services we procure
- Regularly review and critically assess progress against our sustainability commitments to encourage a culture of continual improvement
- Contribute to Client annual public reporting of sustainability performance.
