

Policy

Environment Policy

Our commitment

The Beerburrum to Nambour Rail Upgrade Project (B2N) values the natural environment and communities in which we work. Our goal is to use resources efficiently, adapt to climate change, prevent pollution and to enhance and protect the environment and our heritage.

Our approach

Our values of caring, empowering, imaginative and future-focused are the platform for B2N's everyday interactions. B2N will use these values to guide our approach to the environment.

Environment Policy in practice

- Driving a strong culture to respect the environment across the project.
- Prioritising the environment, the community, sustainable products and resource efficiency in our decision making.
- Providing best practice training and education to our people to build awareness and capability to protect the environment and respect the communities in which we work and live.
- Empowering our people, partners and subcontractors to speak up about how we can better protect and enhance the environment.
- Encouraging participation and collaboration to achieve sound environmental performance and outcomes.
- Driving accountability by ensuring everyone is responsible for valuing and protecting the Environment.
- Focusing on continual learning and improvement by reviewing performance, capturing and sharing lessons learnt and celebrating successes.
- Exploring and introducing new technologies and approaches that minimise impacts on the environment and provide cost effective solutions that are resource efficient.
- Having a transparent critical risk management process that helps us to continuously identify opportunities and improvements to our systems and processes.
- Exceeding our legislative, client and other mandatory requirements.
- Establishing and maintaining an effective management system.
- Ensuring our work leaves a positive legacy for the communities we serve and the environments we operate in.
