

# Policy

## Procurement

### Our commitment

E2G is committed to efficient, effective, ethical and sustainable procurement.

### Our approach

E2G will strive to maximise value for the company, its shareholders, clients and the communities we operate in through best in class ethical and sustainable procurement practices.

### Procurement in practice

Without suppliers E2G cannot meet shareholder, client or community expectations. The way we procure and manage the supply chain has a significant influence on profitability, reputation, stakeholders, communities and our success in meeting our sustainability objectives and expectations.

E2G will and expects all our employees, contractors and business partners to:

- Uphold ethical business practices, comply with legislation, regulations, standards, codes, licences and comply with applicable codes of business conduct, policies and procedures including those of E2G;
- Understand the risks and complexities of the services and products we procure so that we can recognise and respond to issues appropriately to minimise risks;
- Develop, promote and maintain systematic, integrated and competitive selection, approval, and review processes to manage all critical and strategic suppliers;
- Continuously improve supplier relationships, and develop a resilient supply chain;
- Ensure procurement decisions are aligned with the business strategy and plans, and take into consideration total lifecycle cost and the triple bottom line being the economic, environmental and social impacts.
