1 Project summary

The M7 Motorway (Modification 6 Widening; SSI-663-Mod-6) (M7 Widening) and the M12 East package of the M12 Motorway project (SSI 9364) will be delivered together under what is referred to as the M7-M12 Integration project (the project) (refer to Figure 1-1) by John Holland.

The M12 Motorway extends between the M7 Motorway at Cecil Hills and The Northern Road at Luddenham, over a distance of about 16 km. It will be delivered in multiple packages including the M12 West package, M12 Central package and M12 East package (this package is part of the M7-M12 Integration project). The M12 East package involves two components of work:

- Connecting Elizabeth Drive to the M12 Motorway and the upgrade of approximately two kilometres of Elizabeth Drive from east of Duff Road to 300 metres east of the M7 Motorway
- Providing a grade separated motorway to motorway connection between the M7 Motorway and M12 Motorway.

The M7 Widening project will enable the construction and operation of an additional lane in both directions within the existing median of the Westlink M7 for approximately 26 kilometres (km). Works will occur from about 140 metres (m) south of the Kurrajong Road overhead bridge at Prestons (southern end) to the Richmond Road interchange at Oakhurst/Glendenning (northern end), excluding widening through the Westlink M7/M4 Motorway (Light Horse) Interchange.

— M7 Widening
— M7-M12 Interchange
— Elizabeth Drive Connection
— M12 Motorway
— Existing motorway

M7M12 INTEGRATION PROJECT

2 Environmental Protection Licence and Reporting Requirements

John Holland Pty Ltd obtained the Environment Protection Licence (EPL No. 21829) from the NSW Environment Protection Authority for the project on 2 August 2023. The licence is for construction works relating to road construction as defined under Schedule 1 of the *Protection of the Environment Operations Act 1997* (POEO Act).

The licence describes monitoring and reporting requirements for the Works. The following report details environmental monitoring undertaken during this reporting month conducted in accordance with the EPL.

The EPL can be found by following the link below to the EPA's website: epa.nsw.gov.au

3 Noise and vibration monitoring

3.1 Noise monitoring

Noise monitoring was undertaken during the reporting period and all works were deemed compliant as the noise sources were predominantly dominated by background noise sources e.g., local traffic. Table 4-1 contains a summary of the noise monitoring results.

3.2 Vibration monitoring

No Vibration monitoring was undertaken during the reporting period as no vibration intensive works were undertaken.

4 Discharge Water Quality Monitoring

No offsite discharge occurred during August 2023.

Table 4-1 Noise monitoring data

Monitoring Location (Noise-Catchment Area, Street, Suburb)	Monitoring Date	Attended or Continuous Monitoring	Parameter	Measured Value	Goals / Targets dB(A)	Project OOHW Compliance	Comments/ Field Observations
2073 Elizabeth Drive, Cecil Hills (NCA04)	16/08/2023	Attended	LAeq 15 min	68.5	64	Compliant	Traffic from Elizabeth Drive and background noise dominant sources throughout the monitoring period. M7-M12 works were inaudible throughout the monitoring period. M7-M12 works compliant.
Tank Road, Elizabeth Drive (NC05)	24/08/2023	Attended	LAeq 15 min	72.5	65	Compliant	Traffic from Elizabeth Drive and background noise dominant sources throughout the monitoring period. M7-M12 works were inaudible throughout the monitoring period. M7-M12 works compliant.
33 Isabel Street, Cecil Park (NC02)	30/08/2023	Attended	LAeq 15 min	62.2	55	Compliant	Traffic from Elizabeth Drive, M7 and background noise dominant sources throughout the monitoring period. M7-M12 works were inaudible throughout the monitoring period. M7-M12 works compliant.

Note:

1. LAeq (15min) - The A-weighted equivalent continuous (energy average) A-weighted sound pressure level over a 15-minute period.
2. dBA - Decibels using the A-weighted scale measured according to the frequency of the human ear.

Table 4-2 Vibration monitoring data

Monitoring Location	Monitoring Date	Attended or Continuous Monitoring	Measured VDV (m/s ^{1.75})	VDV Target (m/s ^{1.75})	VDV Compliant	Measured PPV (mm/s)	PPV Target (mm/s)	PPV Compliant	Comments/ Field Observations
N/A									

Note:

1. VDV – Vibration Dose Value
2. PPV – Peak Particle Velocity
