

Our commitment

Rail Infrastructure Alliance is committed to efficient, effective, ethical and sustainable procurement.

Our approach

The Alliance will strive to maximise value for the project, its stakeholders, and the communities we operate in through best in class ethical and sustainable procurement practices.

Procurement Policy in practice

Without suppliers the Alliance cannot meet stakeholder or community expectations. The way we procure and manage the supply chain has a significant influence on profitability, reputation, stakeholders, communities and our success in meeting our sustainability objectives.

The Alliance will and expects all our employees, contractors and business partners to:

- Uphold ethical practices, comply with legislation, regulations, standards, codes, licences and comply with applicable codes of conduct, policies and procedures;
- Understand the risks and complexities of the services and products we procure so that we can recognise and respond to issues appropriately to minimise risks;
- Develop, promote and maintain systematic, integrated and competitive selection, approval, and review processes to manage all critical and strategic suppliers;
- Continuously improve supplier relationships, and develop a resilient supply chain;
- Ensure procurement decisions are aligned with the project's strategy and plans, and take into consideration total lifecycle cost and the triple bottom line being the economic, environmental and social impacts.
